

Study Guide

for the Registration Examination for Dietetic Technicians

7th Edition

The newest edition of our study guide is available as a resource for individuals preparing to take the registration examination for dietetic technicians.

It includes:

- a comprehensive study outline based on the examination content specifications that were implemented January 1, 2017,
- suggested study references,
- study tips,
- a print copy of the 110-question practice examination that is also provided via an online format, and
- two single use vouchers to use when accessing the online practice examination.

Please note that the practice examination is administered by TesTrac, CDR's vendor, and that the practice examination questions (110) are identical in both formats. The online version simulates the actual computerized registration examination format and randomizes the distribution of exam items.

See reverse for Study Guide order form.

This form expires December 31, 2021
